

# CRYPTOUNITY

START SIMPLE. STAY SECURE.

## THE PROBLEM

### THE CRYPTO WORLD EXPECTS NEWCOMERS TO FIGURE EVERYTHING OUT ON THEIR OWN.

The lack of experience, prior knowledge, and assistance can lead to unnecessary mistakes and loss of funds. This often discourages new users from engaging with crypto for an extended period.

## THE SOLUTION

### AN EXCHANGE WITH ALL THE KEY ELEMENTS - ADAPTED UI/UX, EDUCATION & SUPPORT.

Beginners seek simple yet trustworthy platforms and reassurance from the crypto community. With that in mind, we have created an all-in-one platform with a crypto exchange, that guides them through the emotional roller-coaster that crypto is and provides the safest solutions at the same time.

## CRYPTOUNITY START SIMPLE

CryptoUnity is a beginner-focused exchange that guides users with educational content and support. It offers an intuitive and user-friendly experience, empowering newcomers to confidently engage with the exchange.

## STAY SECURE

Using an **INDEPENDENT & REGULATED CUSTODIAN** ensures secure, segregated and independent holding of customer assets, which remain safe and accessible even during any challenges the company may face.

By adding a **COLD WALLET WITH AN NFC CARD**, we provide a crucial aspect of decentralization that allows users to have full control over their funds.

WIDE UTILITY

## CUT - CRYPTOUNITY TOKEN

CUT plays an important role in the operation of the entire CryptoUnity platform. With development of the platform, new utility will be added, however currently, there are 3 main use cases:

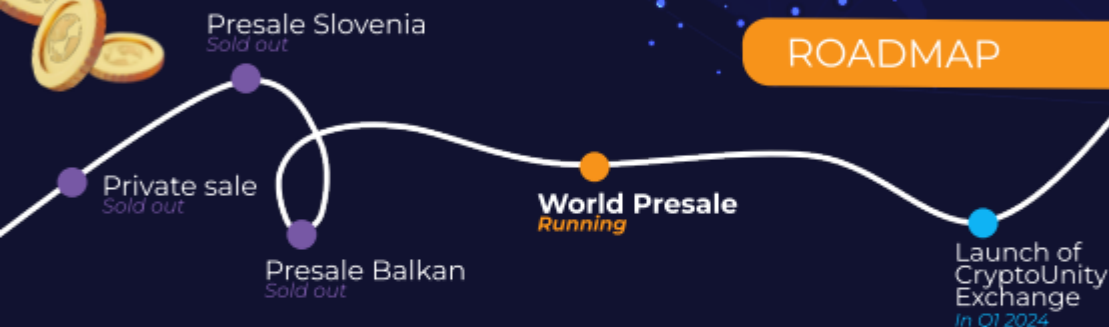

- ▶ lower fees on the CryptoUnity exchange
- ▶ access to the launchpad and reviews of ICOs
- ▶ access to educational courses and lectures
